

# Roei Dubin

## Computer Science Student

I am a 24-year-old hardworking Second-year Computer Science student seeking a software development position.

I bring hands-on experience in system monitoring (NOC), solid programming knowledge, and the ability to perform under pressure — developed through real-time technical roles and military service.

Passionate about problem solving, teamwork, and learning new technologies to drive meaningful impact.

**English - Fluent**

## Experience

2024-2025

Final- NOC Operator

NOC Operator with experience in real-time monitoring and troubleshooting of critical systems, working under high-pressure environments, including direct interaction with financial exchanges. Strong understanding of network infrastructure, system performance analysis, and incident response. Experienced in Linux, Docker, Kubernetes and AWS. ensuring high availability and scalability of services. Passionate about transitioning into a development role, leveraging problem-solving skills and programming knowledge to enhance system reliability, automation, and performance optimization.

2023

Buyme - Costumer Service

I have gained valuable experience in customer service during my tenure at Buyme.

My role involved effectively utilizing various Microsoft office tools to provide exceptional support and service to customers.

2022 - 2023

Ticketmaster - Costumer Service

I gained experience in customer service, where I thrived in a team environment that demanded effective performance under pressure.

A significant part of my responsibilities included composing well-crafted emails to address customer inquiries and concerns.

2019 - 2022

Military Service -IDF

During my military service in the IDF from 2019 to 2022, I began my journey in the rigorous training program of the Egoz Unit as a Commando Fighter. This intense training cultivated my resilience, discipline, and teamwork skills. Unfortunately, due to an injury, I transitioned to the Intelligence Directorate of the Commando Brigade. In this role, I collaborated closely with senior officers, including a Colonel, in high-pressure scenarios, where I honed my analytical and strategic planning abilities. I adeptly utilized Microsoft Office tools such as Excel, PowerPoint, and Outlook to support various intelligence operations, demonstrating strong problem-solving skills and the ability to perform effectively under stress.

Additional Information

- Interest in economics, stock market and crypto
- Surfing, football and yoga are my hobbies
